

Company overview

Company

BIOMAPAS is a privately owned contract research organization (CRO), established in 2001 and providing a wide range of clinical services in Phases I-IV clinical trials for pharmaceutical and biotechnology industries. From the very start, the Company has been actively cooperating with the Kaunas University of Medicine, University Clinics and other Lithuanian medical institutions. Thus, BIOMAPAS assures a highly professional, scientific completion of all projects.

Company is strategically located in Kaunas (Lithuania) and has an access to patient populations in all Baltic States and Belarus, a region with a population of over 17 millions inhabitants. With an in-depth knowledge of specifics in the post-Soviet area and extensive contacts BIOMAPAS can start operations in Russia and Ukraine as well.

Currently, BIOMAPAS employs a full-time staff of 13 highly motivated, reliable, and flexible experts – experienced medical doctors, pharmacists, IT specialists, statisticians and others. External expertise is hired relevant to the requirements of any specific project. The Company policy encourages all employees to continuously advance in their professional fields. As many as five BIOMAPAS employees have Ph.D. degree. Three hold degrees in pharmacy, and the other two in the medical sciences.

Service

BIOMAPAS is structured to provide all essential services in Phases I-IV clinical trials for pharmaceutical and biotechnology industries. Our service is primary focused on monitoring, conducting phase I (bioequivalence/bioavailability) trials, data management and biostatistics. We also can propose project management, medical writing, post marketing surveillance, pharmacovigilance and clinical supply management.
